- | | | | |
|----------------------|--------------|-----------|-----------|
| • CPS 106 – Python | Organization | • CMN 300 | • CPS 310 |
| • CPS 213 – Computer | • MTH 110 | • CPS 209 | • CPS 412 |

Experience

SciXchange, Toronto Metropolitan University

Robotics Instructor

September 2026 – Present

Toronto, ON

- Support hands on robotics activities and STEM outreach for youth.
- Help students learn basic robotics, technology, and engineering concepts.
- Explain technical concepts in a clear and engaging way.

Rowdah Center

Developer

May 2026 – August 2026

Mississauga, ON

- Worked with a team to develop a Smart Donation Kiosk System for Rowdah Center.
- Reviewed the existing Excel based donation process and identified areas for improvement.
- Helped design a donation system that supports cash, card, and QR code payments.
- Planned how the frontend, backend, payment services, and database would work together.
- Helped define features including digital receipts, transaction tracking, backups, and anonymous donations.

PetSmart

Pet Associate

April 2025 – May 2026

Mississauga, ON

- Helped customers find products based on their needs and provided product recommendations.
- Recommended and upsold relevant products to help meet store sales targets.
- Restocked merchandise and maintained organized product displays.
- Worked with team members to provide customer service in a fast paced retail environment.

Projects

Smart Donation Kiosk System | *JavaScript, React, Node.js/Python, Firebase/MySQL, Stripe/Square*

- Created a concept for a digital donation system to replace manual Excel based tracking.
- Planned a kiosk and QR code workflow for cash, card, and online donations.
- Designed a database structure for storing donation and transaction information.
- Planned features for transaction tracking, digital receipts, and anonymous donations.
- Considered security features including backups, encryption, and role based access.

30 Days of Python | *Python, Git, GitHub*

- Built small Python programs while learning variables, functions, loops, conditionals, and user input.
- Completed programming exercises to practice problem solving and strengthen Python fundamentals.
- Used Git and GitHub to organize and track my code.

Technical Skills

Languages: Python, JavaScript, HTML/CSS

Frameworks: React, Node.js

Databases: Firebase, MySQL

Developer Tools: Git, GitHub, VS Code

Other: REST APIs, System Architecture, Version Control
